INTRODUCTION

The existence of crime in our state is a concern not only of law enforcement but of our society as a whole. This report presents an overview of criminal activity in Delaware in 1986.

There are a variety of statistics which could be used in the portrayal of crime in Delaware. These types include penal, prosecutive, arrest, offense, and conviction data. To depict the most meaningful data, the Uniform Crime Report Program (UCR) data on offenses known to police, persons arrested, and victims, is utilized.

Because of their seriousness, frequency of occurrence, and potential for accurate reporting, eight offenses (Homicide, Rape, Robbery, Aggravated Assault*, Burglary, Larceny, Motor Vehicle Theft, and Arson) were chosen by the federal government to comprise a Crime Index and serve as indicators of the national crime experience. This report uses these national measurement criteria to report the status of CRIME IN DELAWARE - 1986.

There are limitations when using the national reporting standard; it does not address all crimes, and can present a misleading picture of the Total Crime. To correct this deficiency and provide a summary of all reported crime, the first section of this report provides a brief description of the Total Crime in Delaware in 1986. Section Two addresses the eight Index Crimes, and Sections Three and Four further expand on Violent and Property Crime classifications of Index Crime.

Clarification of total crime and reported crime is warranted to provide the proper prospective of the scope of this report.

Total Crime is defined as the Index Crimes (or Part I Crimes) which encompass the eight crimes identified in paragraph 3 above, and Part II Crimes. Part II crimes encompass all crimes not defined as Index Crimes. Traffic violations are not considered in these computations.

Reported Crimes are offenses that have been reported to and documented by law enforcement agencies. Historically, all committed crimes are not always reported to the authorities. The failure to report crimes contributes to a reduction in the UCR crime activity level within any given period of time. If non-reporting levels remain consistent, a comparison between

time periods (e.g. Annual Reports) can accurately measure trends in criminal activities. If public apathy or intensity toward reporting crime change significantly, the comparison may become inaccurate.

On occasion, an agency will receive a crime complaint which is determined, through investigation, to be false or baseless. If investigation shows that no offense occurred, the reported offense is still recorded but classified as "Unfounded". (Refusal to prosecute, failure to recover stolen property, or to make an arrest does not constitute an unfounded complaint). This report addresses only criminal offenses that have been investigated and found to be legitimate crime complaints.

Non-reporting of some data elements of the Uniform Crime Report (UCR), and other annual report program computation disparities have resulted in some tables and charts containing different data totals. Where a conflict existed, the data on the individual End of Year UCR report was utilized.

* Aggravated Assault is not a crime classification in Delaware. In Delaware assaults are classified by the degree of seriousness of the offense. Determination of the level of seriousness for each assault is relative to the offense's felony or misdemeanor classification. This report utilizes SERIOUS ASSAULTS (Felony Assaults) data to represent Aggravated Assaults.

EXECUTIVE SUMMARY

Crime in Delaware increased in 1986 compared to 1985. The increase of 3,498 offenses were mostly within the less serious category of criminal offenses. Index Crime continues to be seasonal; crime complaints averaged 18.8% higher in the summer months of June, July and August. This summary provides a salient point synopsis of each section of this report. Comparisons (increases/decreases) are made between 1986 and 1985 data. Each synopsis gives the report page number where additional information for the subject can be located.

TOTAL CRIME: 103,308 criminal offenses were reported to the law enforcement agencies, an increase of 3,498 (+3.5%). Seventy percent of the offenses were the less serious or less frequently occurring felony or misdemeanor crimes. There were 29,735 arrests, 2,756 more than 1985, an increase of 10.2%.

TOTAL CRIME SUMMARY

There are limitations in using the Uniform Crime Report's national reporting standard of Index Crimes in producing this crime statistical report. These limitations can create a misleading picture of the Total Crime in Delaware. To correct this potential misconception this section has been included to provide a broad picture of all reported criminal complaints in 1986.

Crime in Delaware increased by 3,498 complaints, to 103,308, an increase of 3.5% over 1985. This is the second consecutive year that Total Crime complaints have increased by 3.5% and the third consecutive yearly increase. It is the first year that Total Crimes have exceeded 100,000 complaints. Seven of every ten offenses were the less serious or less frequently occurring felony and misdemeanor offenses (Part II Crimes) and were the only category to report an increase in complaints. The highly visible Index Crimes (Part 1 Crimes), of the Uniform Crime Report, decreased 168 offenses.

Included in this section are tables and charts on all crime complaints reported, and the Age, Sex, and Race of Arrested Offenders.

INDEX CRIME SUMMARY

This section contains data on Index Crimes which are comprised of selected Violent and Property Crimes reported through the Uniform Crime Report Program. The eight Index Crimes are Homicide, Rape, Robbery, Serious Assault (Aggravated Assault*), Burglary, Larceny, Motor Vehicle Theft, and Arson. These crimes were selected as the national reporting standard because they are serious in nature, occur frequently, and are normally reported to law enforcement agencies.

In 1986 Index Crimes decreased by 168 offenses, a decrease of less than 1%. Violent Crimes decreased by 6 complaints and Property Crimes decreased by 162 complaints compared to 1985.

Included in this section are tables and charts on Violent and Property Crime Complaints Totals, Crime Rates, Complaint Clearance, Value and Type Property Stolen and Recovered, and Age, Sex and Race data of Arrested Offenders and Victims.

* Aggravated Assault is not a crime classification in Delaware. In Delaware assaults are classified by the degree of seriousness of the offense. Determination of the level of seriousness for each assault is relative to the offense's felony or misdemeanor classification. This report utilizes SERIOUS ASSAULTS (Felony Assaults) data to represent Aggravated Assaults.

Serious Assault (Aggravated Assault*) offenses in 1986 decreased by 79 offenses to the lowest level in eight years and is the fourth consecutive yearly decrease. Compared to 1985 this is a 5% decrease. Firearm usage during Serious Assaults also decreased by 5% from last year. Adults were primarily involved as 89% of the arrests and 83% of the victims were adults. There were no apparent trends to identify the most prevalent victim age grouping. Assault victims were spread evenly within all age groupings of juvenile and adult classifications, and widely throughout the victim to offender relationship categories.

Included in this section are tables and charts on Statewide and County Offense Totals, Crime Rates, and Age, Sex and Race data of Arrested Offenders and Victims.

* Aggravated Assault is not a crime classification in Delaware. In Delaware assaults are classified by the degree of seriousness of the offense. Determination of the level of seriousness for each assault is relative to the offense's felony or misdemeanor classification. This report utilizes SERIOUS ASSAULTS (Felony Assaults) data to represent Aggravated Assaults.
